

The diagram shows a 4x4 grid world. A green line with circular nodes represents a path from the bottom-right towards the top-left. The nodes are colored yellow, red, yellow, red, yellow, red, yellow, and yellow from bottom to top. A purple arrow points from the top-most yellow node towards the top-left corner. Blue arrows indicate a flow field: horizontal arrows point left in the middle two rows, and vertical arrows point up in the first and third columns. A box labeled 'Fluid' is in the top-right, and a box labeled 'Robot' is in the bottom-right.

Fluid

Original:

$$E_i v^f = v_i^r$$

Integral-form:

$$\int_{S_i} E_i v^f ds = \int_{S_i} v^r ds$$

Robot
